

Synthetic Clinical Notes

P002_wrong_diagnosis

Patient

Patient ID: P002

Diagnosis

The patient has mild Condition Alpha. The available clinical documentation does not describe the condition as moderate-to-severe.

Previous Treatment

Treatment A was started on January 10, 2026 and was discontinued on April 10, 2026. Total treatment duration was approximately 12 weeks.

Clinical Response

The patient reported inadequate clinical response to Treatment A. The treating physician documented that the patient did not achieve sufficient improvement.

Treatment Outcome

Treatment A was discontinued because of inadequate clinical response. The physician documented that the treatment was ineffective and that the patient did not achieve sufficient improvement.

Synthetic test data for the PriorAuth AI prototype. Not a real patient record.
